NATHANIEL IDYEGE - Frontend Developer

(+234) 9032461074 | idyegenathaniel@gmail.com

https://github.com/IdyegeNathaniel | https://idyege.vercel.app/ | Nigeria.

Frontend Developer with experience in building fast, responsive, accessible web applications using React.js, TypeScript, and Tailwind CSS. Proven track record of turning Figma designs into high-performing interfaces and improving user engagement through clean, scalable code. Eager to contribute to fast-paced teams delivering real-world impact.

Technical Skills

- Languages: JavaScript, TypeScript.

- Frontend: React.js, Next.js, Nuxt.js, HTML5, CSS3, Tailwind CSS.

- Backend (Basic): Node.js, Express.Js, REST APIs.

- Tools: Git, GitHub, Vercel.

Experience

Frontend Developer - Mlooop   **March - June 2025**

- Built and shipped multiple Vue.js/Nuxt.js components in a production-grade web app, reducing page load times by 30% through performance optimization.

- Translated complex Figma designs into pixel-perfect, responsive UIs with Tailwind CSS, improving mobile usability scores by over 20%.

- Worked with cross-functional teams using Git and collaborative tools to deliver features 2 days ahead of sprint deadlines.

Selected Projects

Barber-Place | *React.js, TypeScript, TailWind CSS*   **January 2025**

- Developed a salon booking platform that allows users to schedule appointments by available time slots.

- Achieved >95% Lighthouse performance score and optimized for mobile-first usage.

- Improved user onboarding flow, reducing booking friction and bounce rate during testing phase

.

Coin-Master | *React.js, Tailwind CSS, CoinGecko API*   **December 2024**

- Built a real-time cryptocurrency tracker, integrating the CoinGecko API to display live price movements and market rankings.

- Implemented responsive charts and conditional rendering, increasing engagement metrics by 40% based on user feedback.

- Ensured full cross-browser compatibility and maintained a 100% pass rate in responsive design tests.

LeadSales | *React.js, Tailwind CSS, Express.js*   **September 2024**

- Developed a full-stack property trading platform with CRUD capabilities and server-side filtering/search via Express.js.

- Architected reusable components and handled API integration for dynamic property listings, enabling a seamless user experience.

- Scaled app structure to support pagination and user form validation, reducing API call errors by 25%.
