

NATHANIEL IDYEGE - Frontend Developer

(+234) 9032461074 | idyegenathaniel@gmail.com | [GitHub](#) | [Portfolio](#) | Nigeria

Product-focused Frontend Developer with experience building responsive and scalable web applications using React, Next.js, and TypeScript. Proven ability to translate high-fidelity designs into production-ready interfaces, integrate backend APIs, and contribute to performant user experiences across SaaS and web-based platforms. Experienced collaborating within agile teams to deliver accessible, modern applications through clean frontend architecture and efficient development workflows.

Experience

Frontend Developer - TrueMinds | Internship

February - May 2026

- Engineered a responsive restaurant eCommerce SaaS platform from detailed Figma designs, delivering pixel-perfect and production-ready user interfaces
- Built scalable frontend architecture with reusable and maintainable UI components
- Collaborated within an agile development team on frontend feature implementation and user experience improvements
- Integrated backend APIs to support dynamic and data-driven application workflows
- Contributed to production-level development practices using modern frontend technologies and Git-based collaboration workflows

Frontend Developer - Mlloop | Contract

March - June 2025

- Built and shipped multiple Vue.js/Nuxt.js components in a production-grade web app, reducing page load times by 30% through performance optimization.
- Translated complex Figma designs into pixel-perfect, responsive UIs with Tailwind CSS, improving mobile usability scores by over 20%.
- Collaborated with designers and backend developers to refine user flows and deploy features two sprints ahead of schedule.

Selected Projects

MoodLit | In Progress

- Developing a mood-driven book discovery platform that personalizes recommendations based on users' emotional preferences rather than traditional genre filtering.
- Building responsive and accessible user interfaces using Next.js, TypeScript, and Tailwind CSS
- Implementing scalable client and server state management with Zustand and TanStack Query
- Integrating external APIs and backend services to support personalized recommendation and reading-tracking workflows
- Designing user-focused features including mood-based discovery, personal libraries, reading analytics, and theme customization
- Architecting a modern full-stack application using PostgreSQL, Prisma, Clerk authentication, and Vercel deployment workflows

Vestir | Next.js, MUI, Zustand, Zod, Framer Motion

- Built and deployed a responsive e-commerce platform with Next.js, TypeScript, and Material-UI using reusable component architecture.
- Engineered multi-step checkout workflows with Zod validation, improving UX and data integrity.
- Optimized performance with image optimization and modern routing for fast, seamless interactions.

FitForecast | Next.js, Tailwind CSS, OpenWeatherMap API

- Developed and deployed a web application providing daily weather forecasts and intelligent outfit recommendations.
- Integrated real-time weather APIs to deliver accurate, dynamic data.
- Designed an intuitive, mobile-first UI focused on quick daily use.

- Achieved >95% Lighthouse performance score.

Skills & Technologies

- **Programming Languages & Core Technologies:** JavaScript, TypeScript. Node.JS/Express
- **Frontend Development:** React.js, Next.js, Nuxt.js, HTML5, CSS3, Tailwind CSS, Material-UI.
- **Tools:** Git, GitHub, Thunder Client, Vercel, Chrome DevTools.
- **Practices:** Responsive Design, Accessibility (WCAG, ARIA), Component-Based Architecture, Cross-Browser Compatibility, Agile, Performance Optimization.

Education

BSc. Environmental Management and Toxicology
Benue State University, Makurdi, Nigeria.

December 2024
